
(a) generators alone
ratio to DELPHI
mixture at $\xi = \frac{1}{2}$ with its band
Herwig alone
Sherpa alone
DELPHI
window of the calculation
$\tau = 1 - T$
(b) calculation imposed
ratio to DELPHI
mixture at $\xi = \frac{1}{2}$ with its band
Herwig alone
Sherpa alone
DELPHI
$\tau = 1 - T$
(c) generator band
percent of prediction
generators alone
calculation imposed
τ
(d) theory band
above the prediction
below the prediction
τ
(e) learning band
generators alone
calculation imposed
statistical error
τ
