
(a) log ratio at $\log s = 0.21$
learned f
exact f_{exact}
slope 1.005, correlation 0.9994
(b) difference between $\log s = \pm 0.21$
learned Δf
exact Δf_{exact}
slope 1.006, correlation 0.9996
(c) constant term
coefficient of 1
parameter $\log s$
exact
learned
(d) term in $\sum_i x_i^2$
coefficient of $\sum_i x_i^2$
parameter $\log s$
